

动静分离（Nginx+Tomcat）

1. 安装nginx和tomcat

```
1 $ yum -y install epel-*
2 安装
3 $ yum -y install nginx tomcat tomcat-webapps java
4 启动
5 $ systemctl start nginx tomcat
```

2. 配置nginx实现动静分离

```
1 $ cd /etc/nginx
2 $ cp nginx.conf.default nginx.conf
3 $ vim nginx.conf
4     # 去掉59-61行注释，更改php为jsp
5     location ~ /\.jsp$ { # 过滤jsp结尾的请求
6         proxy_pass http://192.168.189.172:8080; # 转发给tomcat处理
7     }
8
9 $ systemctl restart nginx
```

3. 访问nginx测试动静分离

访问nginx，后面需要加上/index.jsp，例如：192.168.189.172/index.jsp
